Of Interest To Aviators

New Device Shows Distance Between Plane and Solid Earth

Aviators will be interested in the invention of a new altimeter, a device showing just how much the distance is between the flyer and the solid ground. Its purpose is not to tell the height at which a plane is flying, but to show the distance to the safety device to enable aviators to avoid collisions with ground passing through foggy weather. It operates by reflected radio waves originating in a set in the airplane. A signal is sent to the altimeter, which is sent to the waves return to the plane "in the house" and register a distance.

Had Captain Copley's airplane been in the air, the altimeter might have escaped crashing into the jaws of a canyon in Arizona a few weeks ago. He was flying in a dense fog and was unable to see how far he was above the walls of the canyon. Many air pilots have been killed in similar circumstances while flying over mountain ranges.

If the altimeter fulfills its claims it will prove immensely valuable and greatly increase the safety of flying.

CHAPTER XIV—Continued.

Hand straggled to the west. One of his eyes landed on the mighty frame of this huge blond, the great chest covered with muscles, thick hair, and the enormous limbs of the man who was to fight for her. Donald's eyes were like burning coals. The face had a reddish color, but was contorted with a passion that made him seem unstrung. Yet he appeared a mere straggler in comparison to his bulky antagonist.

For a moment Countess became a primitive woman, the folk as though the could read the thought in her eyes. Donald's hand had been darted his lightning of wrath. He saw the man who had insulted her, and he wanted to strike him. He was so full of wrath that he could not think of anything but the fight. He was so full of wrath that he could not think of anything but the fight.

Donald stepped forward with that drawn back to strike the kneeling knight. He was so full of wrath that he could not think of anything but the fight. He was so full of wrath that he could not think of anything but the fight.

Three Countries Owe Money To Canada

Rumania, Greece and Belgium have borrowed large amounts from Canada.

Three countries owe Canada money, the largest debtor being Rumania. This balance sheet is the result of the Dominion to the sum of \$22,500,000.

Money was received from Rumania during the fiscal year of 1927-28, but the government holds four per cent. bonds for a total amount maturing in 1937.

The Greeks paid \$150,000 during the year and will liquidate the remainder in 1937, increasing to \$1,000,000. The debt is wiped out in 1948.

Canada made advances to Belgium totalling \$4,000,000 in 1927.

Meaning what? It is the result of the fact that the government holds four per cent. bonds for a total amount maturing in 1937.

The Greeks paid \$150,000 during the year and will liquidate the remainder in 1937, increasing to \$1,000,000. The debt is wiped out in 1948.
